## EDUCATION

---

**Paul University | Anambra State, Awka**  
**Bachelor of Science in Computer Science**

November 2017 - January 2022  
Cumulative GPA: **3.9**

## Skills

---

**Technical Skills:** JavaScript, TypeScript, React, Redux, React-testing-library, Git, GitHub, HTML5, CSS3, NodeJS

**Soft Skills:** Good communication skills, Collaborative, Fast learner, Reliable, Adaptable, Self-motivated and many more

## WORK EXPERIENCE

---

**Warri Innovation Hub | Delta State, Warri**

August 2019 – October 2019

### Software Engineering Intern

- Improve the productivity of the company by 60% by working alongside other software engineers to adapt quickly and provide technical assistance to other team members.
- Increased company revenue by 40% by communicating and collaborating with software engineering managers on implementing new product ideas and optimizing the UI and UX of an existing product using tools like Figma.

#### Tools / Technologies

**HTML5, CSS3, JavaScript, NodeJs, Figma, ReactJs.**

## PROJECTS

---

### Messenger | [Website](#) - [Github](#)

- Built a **ReactJs messenger app** powered with **socket.io** for bi-directional transmission of information.
- Created the backend with **NodeJs** and **Express** to send information directly in the system.

### BUGETY | [Website](#) - [Github](#)

- Built a **ReactJs voice powered** budget app for tracking income and expenses.
- Implemented the use of **ChartJs** to provide a graphical representation of data and **Speechly API** for voice interaction.

### WEATHER LOCATOR | [Website](#) - [Github](#)

- Built a **ReactJs** Installable and lightweight **PWA** that provides weather data on a given location.
- Deployed the application to **Netlify**.

## LEADERSHIP

---

- Selected as one of 63 participants to lead a group of software engineers in project development.
- Organized and trained a group of tech enthusiastic transitioning into Tech.

## INTERESTS

---

Hackathons, Web 3, Entrepreneurship and Writing.
